Abstract

The purpose of this service is to provide students with comprehensive information about the various jobs that exist, including requirements, responsibilities, career opportunities, and related industry developments. To increase students' understanding of the world of work, service methods involve career seminars, skills development workshops, industry visits, and the use of online resources. Expected outcomes include increased student knowledge of various professions, a better understanding of available career paths, and the development of skills that match job market needs. In addition, this service increases students' awareness of work.

Keywords: job information, career, requirements, responsibilities, career opportunities

INTRODUCTION

"We are the representatives of the enlightened people who consider the teacher as great as a father and always honor him. When I think of a teacher, I think of the dearest and most respected, intelligent and modern, sincere and kind people. Because to all of us this teacher gave lessons and education and brought up among our loving parents. Today, we are creating the foundations of a new era of development of Uzbekistan. In this, our closest assistants are teachers and trainers, scientific and creative intellectuals. Every family, every It was emphasized that a child's life is connected with the school, and this issue is the most important work of the state and society. We all entrust the life and fate of our dear children to teachers and coaches. These are the custodians of such incomparable wealth, the creators of the future. we must show due respect to the breeds. We can see that the results of modernization processes, reforms and changes are affecting school education and training of new generation personnel.

There are thousands of professions in the world. How to find a goal in this world of colorful professions? Which profession is better to choose to start your life-work activity correctly? The classification of professions can help us in this work. When studying many subjects, we come across various simple and We have learned how to systematize complex objects, facts, events, and other similar things. For example, plant and animal organisms are grouped into types, families, and squads. Various symbols can be used as a basis for the classification of professions. For example, their names can be classified by the first letters that begin with it. It is like the structure of dictionaries. It will not be very convenient to use such a classification for choosing a profession, because to choose a profession, first

of all, it is necessary to know the name of that profession. The whole point is that in most cases, the name of the profession, how it is called the person choosing a profession is unknown. Choosing the right profession is an important step in a person's life, the success of the entire life of the young generation depends to a large extent on how correctly the profession is chosen. In order to match the interests, inclinations, abilities and opportunities of the school student, it is necessary to take into account his health, mastery and emotions, which are more determined and manifested in socially useful and productive work. If a person has a creative attitude to the work he is doing, constantly increases his productivity, looks at his chosen profession with great interest, understands the social importance of his work, if his abilities improve at work, then only then will he be satisfied with work and be happy. In this case, each individual will bring the most benefit to society. The extremely important social importance of choosing a profession comes from these thoughts. Free choice of profession is very important. If a person likes the work he is doing, he will be happy, satisfied, take great initiative, tirelessly increase his productivity. Choosing a profession for schoolchildren should be a conscious necessity and at the same time in the interests of society. it should be appropriate and meet the personal needs of young men and women on the road to maturity. For this, it is necessary to be educated at a high level, in our modern age, science and technology cannot progress without such education. How to get a goal in this world of colorful professions? What is the best profession to choose in order to start the career path of life correctly? To find answers to such questions, you must first have information about professions. There are more than 10,000 professions and specialties in the world. We should choose one of these professions according to our abilities, worldview, and most importantly, our interests and inclinations. For this you need the following information: Indeed, when a person works, his attention is not on the field (however good, prestigious and many other advantages this field has), but on the subject (object) of work. will be directed. It is necessary to do something using this subject (this will be the goal of work). There are weapons and tools in any work. Finally, it is important for a person in what conditions he works. A classification of professions that is convenient for a person who is thinking about choosing a profession is based on these four signs. This scheme allows you to think about your future career path, which you can gradually move from the bottom to the top (from defining the type of profession to discussing its category, etc.) can be considered as a "pillapoya".

RESULT AND DISSCUSION

Choosing the right profession is an important step in a person's life, success in the whole life of the young generation largely depends on how correctly the profession is chosen. Choosing the right profession depends on the interest and inclination of every school student. , in order to match his abilities and capabilities, it is necessary to take into account his health, mastery and emotions, these are more determined and manifested in socially useful and productive work. attitude, constantly increases labor productivity, looks at his chosen profession with great interest, understands the social importance of his work, if his abilities improve in work, only then he will be satisfied and happy with work, in this case each individual brings the most benefit to society. The extremely important social importance of choosing a profession comes from these thoughts. Free choice of profession is very important. If a person likes the work he is doing, he will be happy, satisfied, show great initiative, tirelessly increase his productivity. Choosing a profession for

schoolchildren should be a conscious necessity and at the same time in the interests of society. It should be appropriate and meet the personal needs of young men and women on the road to maturity. For this, it is necessary to be educated at a high level, in our modern age, science and technology cannot progress without such education.
